

ABHRANEEL KHAN

Angular Developer | Frontend Developer

Kolkata, West Bengal, India | +91 8777697241 | abhraneelkhan@gmail.com | www.linkedin.com/in/abhraneel-khan

My Portfolio:- <https://abhraneel-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Angular Developer with 1 year and 3 months of experience building and maintaining enterprise web applications using Angular, TypeScript, JavaScript, RxJS, HTML5, CSS3 and SCSS. Skilled in reusable component design, Reactive Forms, routing, REST API integration, HTTP interceptors and authentication flows. Delivered user-configurable data tables with drag-and-drop column reordering, column visibility settings, server-side pagination, sorting and infinite scroll. Proven ability to diagnose production issues across APIs, CORS, cookies/sessions and browser network behavior in Agile/Scrum teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Node JS, Java, Hibernate, Spring boot, SQL.

Frameworks & Libraries: Angular, RxJS, Angular Material, Angular CDK (Drag and Drop), Bootstrap, ng-bootstrap, ng-select

Angular: Components, Services, Dependency Injection, Lifecycle Hooks, Directives, Pipes, Routing, Child Routes, Modules, Reactive Forms, Custom Validators

API Integration: REST APIs, Angular HttpClient, HTTP Interceptors, HTTP Headers, Cookies and Sessions, JSON, Error Handling

Tools: Git, GitHub, Postman, Visual Studio Code, Chrome DevTools

Practices: Responsive Web Design, Authentication and Authorization, Debugging, Production Support, Agile/Scrum

PROFESSIONAL EXPERIENCE

Angular Developer / Trainee Consultant | TechOxileo Technologies Pvt. Ltd., West Bengal | July 25 – Oct 26

- Develop enterprise Angular modules with TypeScript, HTML5, SCSS and Bootstrap, including reusable components, services, Reactive Forms, tables and modals.
- Integrate REST APIs using Angular HttpClient and RxJS, managing request parameters, payloads, loading states and error handling.
- Implement routing, route parameters and child routes for order, quote, customer and partner workflows.
- Diagnose and resolve production issues involving API failures, CORS, cookies/sessions, routing and UI rendering using Chrome DevTools and Postman.
- Manage feature branches, merges, cherry-picks and conflict resolution in Git; collaborate with developers and QA in Agile sprints.

PROJECTS

ShipCarte - Enterprise Logistics and Order Management Platform

Tech Stack: Angular, TypeScript, RxJS, REST APIs, Angular CDK, Angular Material, Bootstrap, ng-bootstrap, ng-select, SCSS

Overview: Admin web portal for a freight and shipping business to manage orders (including call-in and parent/child orders), quotes and spot quotes, customers, partners and carriers, sales representatives, invoices and billing, shipment tracking and POD/BOL documents.

Responsibilities: Develop and maintain Angular screens for orders, quotes, invoices, customers and partners; integrate backend APIs; improve performance and usability of list screens; resolve production defects end to end.

Key Features Developed:

- Built user-configurable tables with drag-and-drop column reordering (Angular CDK) and a column visibility selector, persisting each user's preferences through REST APIs across 10+ list screens.
- Implemented skeleton loaders and infinite-scroll pagination with server-side sorting, filtering and date-range search for large datasets.
- Developed order action menus (view, edit, copy, status updates, cancellation, POD upload/view, tracking share) and billing and terms-document views with download.

API Integrations: Authentication and OTP verification, order listing and status updates, quotes and spot quotes, invoices, customer and partner order history, user column settings (fetch, visibility, sequence), POD and document upload/download, shipment tracking.

Key Challenges Resolved:

- Identified the root cause of 401 Unauthorized errors after password login: multiple session cookies were combined into a single Set-Cookie header and the SESSION cookie path did not match the API route; documented the fix for the backend team.
- Resolved a skeleton loader that failed to render by correcting the loading-state logic and an unclosed table row in the template.
- Fixed hidden columns disappearing from the column selector after drag-and-drop reordering.

EDUCATION

B.Tech in Information Technology | Guru Nanak Institute of Technology | CGPA-8.5 | 2020 – 2024

Higher Secondary & Secondary | Uttarpara Govt High School | 2018 - 2020

ADDITIONAL PROJECTS

Professional Portfolio (React.js, Axios, Bootstrap 5.3) <https://abhraneel-portfolio.vercel.app/> | **Ecommerce Web** (Angular, Bootstrap 5.3) | **Employee Management System** (Hibernate, Collections Framework, Sql)

CERTIFICATIONS

- Java Full Stack Software Development - QSpiders and JSpiders, Kolkata
- Published Documentation of Facial Recognition System in GIS Science Gernal
